PROJECT

Your new road assistant!
Turkey General Directorate of Highways Traffic Application
You can find all Turkey's instant traffic information. Whether you're in Turkey, where you can plan your route based on traffic before traveling with instant traffic information.

You can view the route you will go between highway, state and provincial routes on the map and get directions, you can easily learn the total distance and time. You can also find out about the road conditions on your route. You can find out if there is any work on your road or if the road is closed for any reason.

In addition to these services that will assist you during your trip, you can inquire if there is a violation of the OGS pass for your vehicle.

Distance Calculation menu allows you to view the distance between two cities and find out the distance of the provinces to their districts.

All the tourist map of Turkey's highways will also be in your pocket.

### Türkiye Trafik - KGM

Türkiye Trafik - KGM

- Project using Swift, XCode, iPhone SDK and Cocoa Touch framework.

- Developed code to tie different view for portrait and landscape orientation for iPhone and iPad.

# ≡ WORK EXPERIENCE

The CHEF.ONE community is based on the interaction between hosts (chefs of any level) and guests (food lovers).

If you are tired of local restaurant food, want to try something new, something authentic, if you want to meet new people who share the same passion for food diversity, CHEF.ONE gives you all of this.

If you love to cook and share, why not make money doing what you love? Why not practice and hone your skills, become known for what you do? Being a chef is all about cooking for others. CHEF.ONE can be a hobby for life or a start of your dream job.

For the initial release, we will operate only in Hamburg, Germany. You can search for events by keywords or browse the map for events near you.
